Survey of the Advisory Committee to prep for Memphis

Posted by Brett Boston on Jun 17 '13

All:

We had a conference call today with NTIA staff to prep for the upcoming meeting in Memphis. A good call, all around.

I have attached the Memphis agenda for the meeting for the whole committee to review.

If there are any specific questions or concerns you would like your representatives to handle at the meeting, please post them to this area in the comments section. Topics will include:

- Rural coverage and issues
- Tribal coverage and issues
- Data collection
- Public - Private partnerships
- Regional coordination
- Governance
- Primary and secondary coverage issues
- Florida specific questions regarding FirstNet and challenges or needs

This will be a good opportunity for us to get first hand input, so make sure we have your questions by next Monday.

Thanks to everyone that participated in the call on short notice.
